

Maximo Application Suite Licensing

Licensing / App Points

IBM Maximo Application Suite (MAS)

Journey to the new operating model

Maximo Application Suite

Best of class capabilities to provide complete view of all assets

ICD

IBM Cloud Pak for Data | IBM Watson Studio | IBM Watson ML | IBM Watson Discovery

Red Hat OpenShift Infrastructure Independent Common Operating Environment

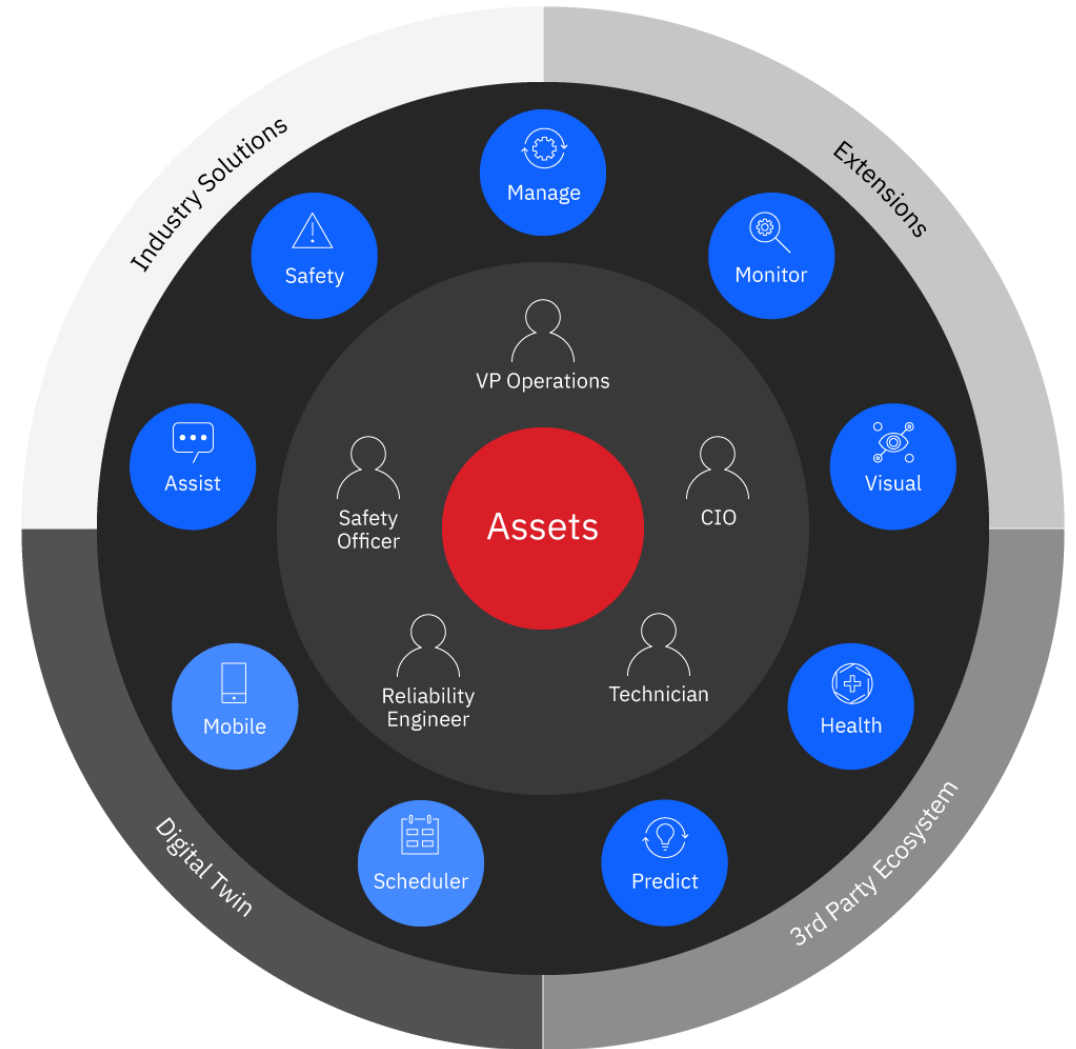

IBM Maximo Application Suite (MAS)

Remote asset monitoring, maintenance and reliability applications in a single platform

- ▶ **Integrated**
 - ▶ applications, faster installation

- ▶ **Flexible**
 - ▶ usage -single, simplified **licensing model** for the entire suite

- ▶ **Multi-cloud**
 - ▶ deployment

Simplified Licensing and Usage

MAS AppPoints will be used across suite

Entitlement covers the whole suite. AppPoints are expended based primarily upon different active User types

1. Single license

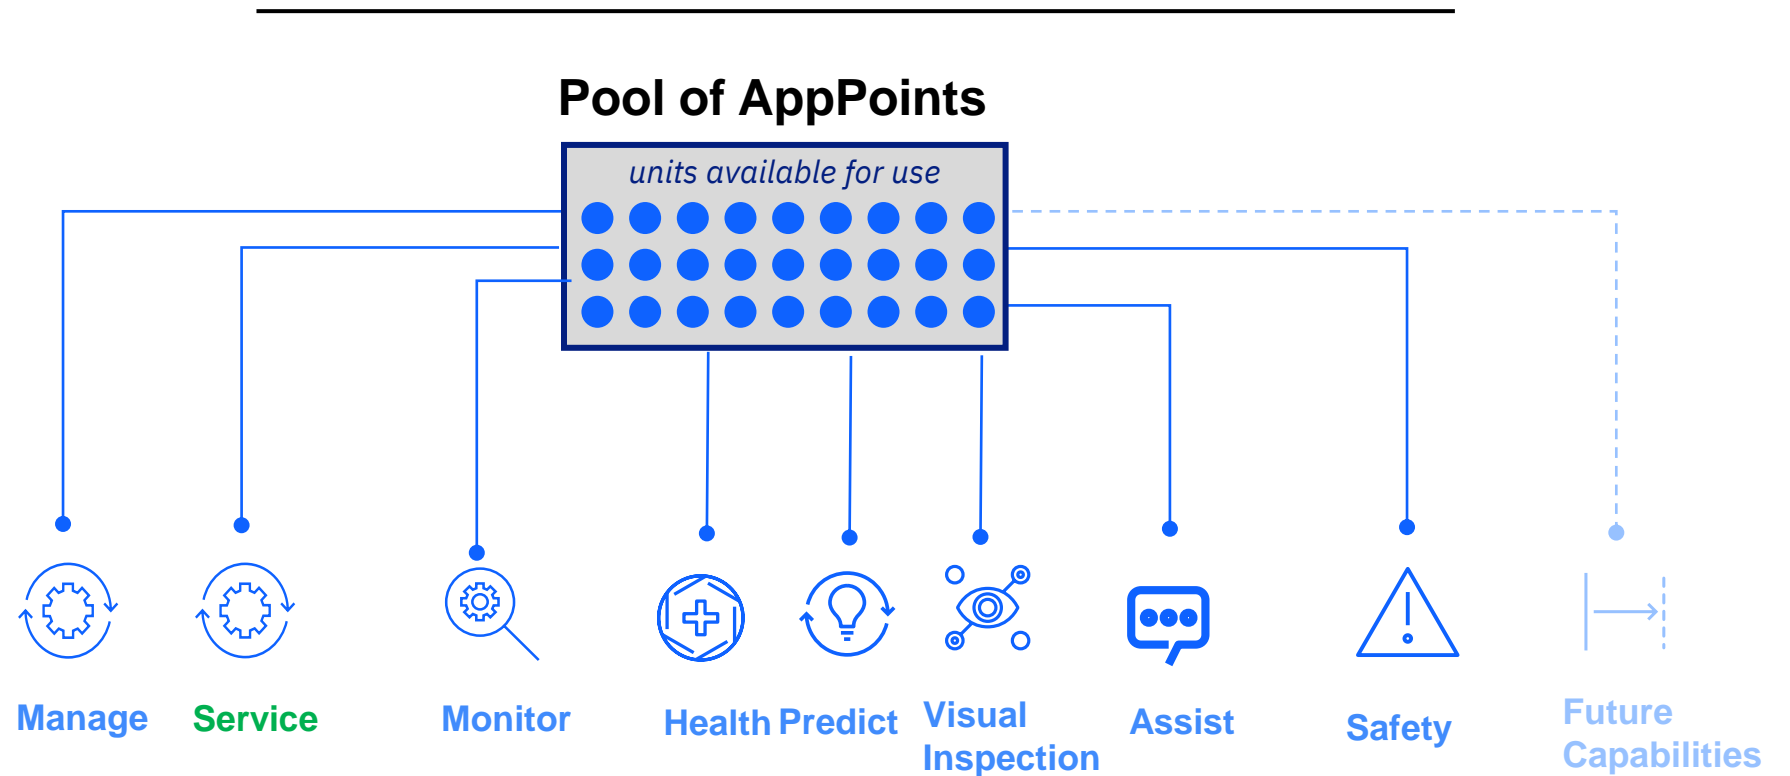

One entitlement to entire Suite

2. Flexible consumption

Sharing of license through concurrent users

3. Simplified usage

Access applications without additional provisioning

Shared Pool of AppPoints

Concurrent Application Users

Check in/out AppPoints on a regular occurrence as users' login/out of the Suite.

Always rotating the amount of AppPoints in the pool.

Installs

These AppPoints are required for each MAS instance and are "reserved" on install of application.

Authorized Application Users and Administrators

These AppPoints are "reserved" to ensure Admins and Authorized users always have access to the application suite.

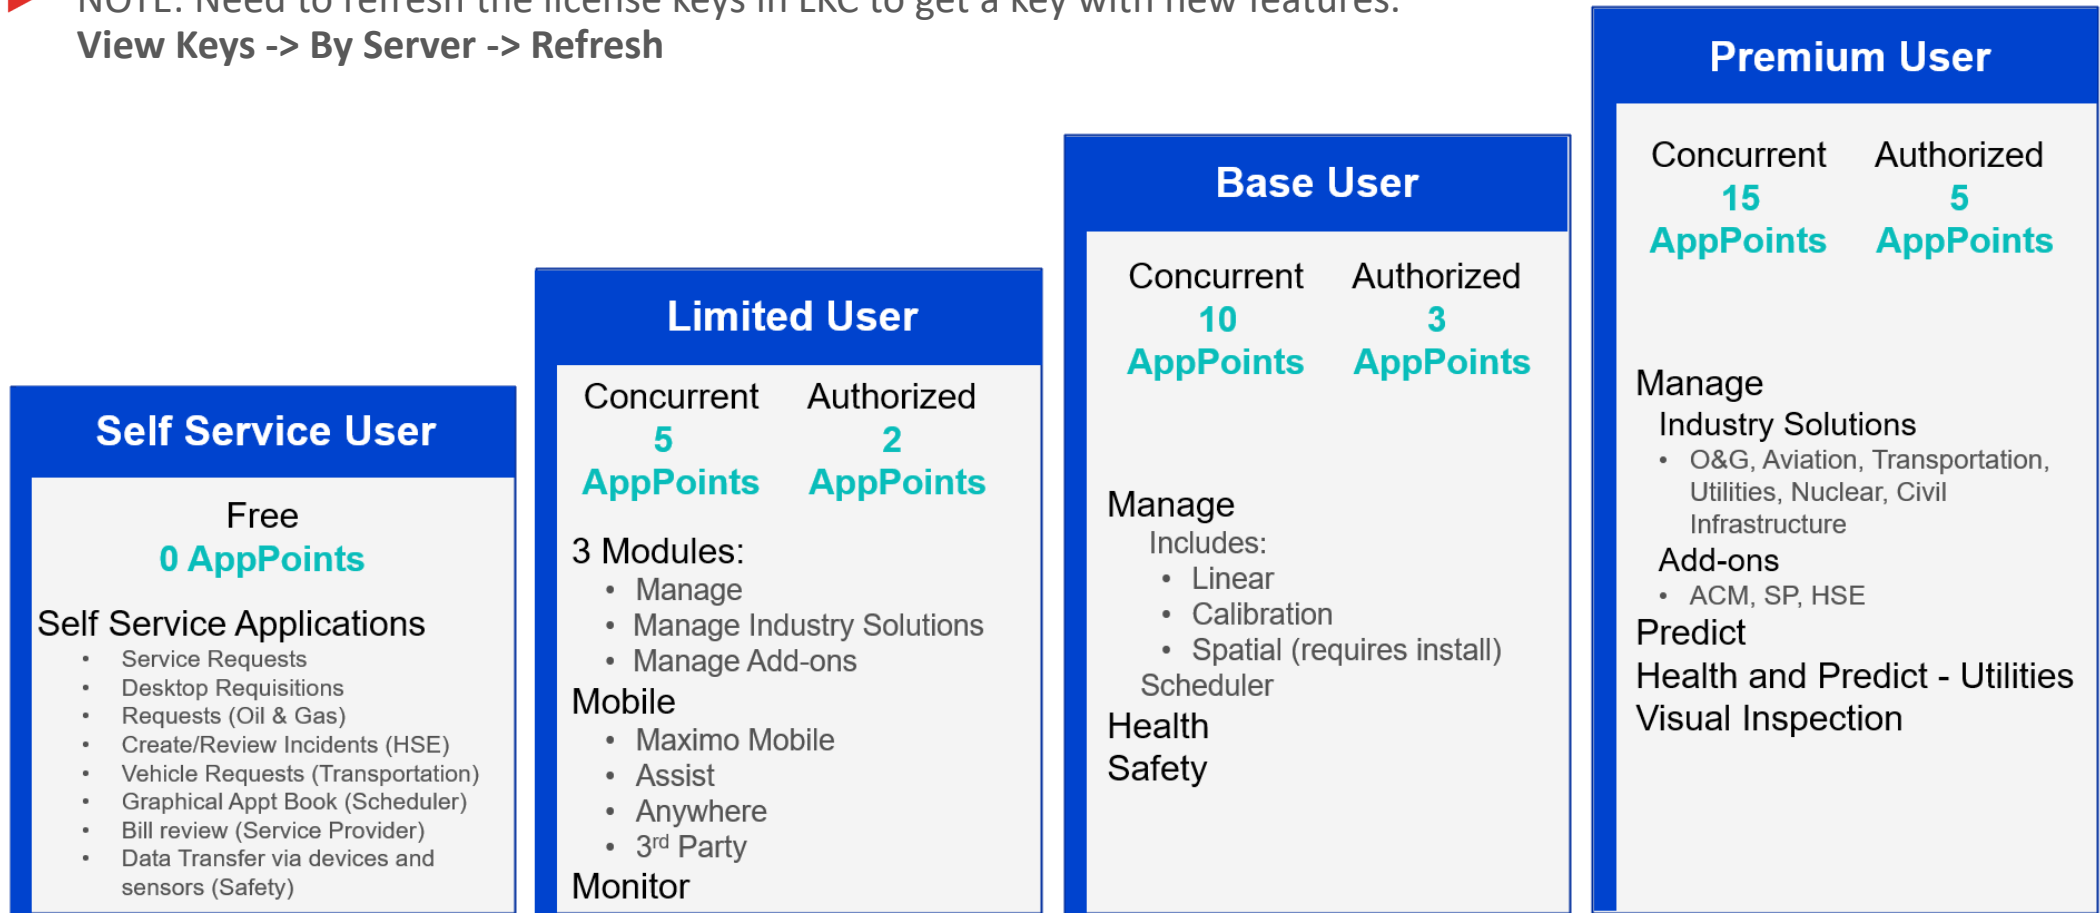

units available for use

Maximo Application Suite License model

Application Concurrent Users have access to use all applications in their level along with tiers below.

- ▶ NOTE: Need to refresh the license keys in LKC to get a key with new features.
View Keys -> By Server -> Refresh

Install – 1 AppPoint (x multiplier)	SAP/Oracle Connector (x80)	Spatial (x20)	Civil Infrastructure (x50)	Visual Inspection (x45) Edge (1 pkg 5)	Assist (x150)	Health & Predict - Utilities (x60)
---	--------------------------------------	-------------------------	--------------------------------------	--	-------------------------	--

User Restrictions

▶ Application Premium User Restrictions

- ▶ An Application Premium User can access all applications within the Application Suite except Administrative Suite apps for Deployment, User Management and Configuration.

▶ Application Base User Restrictions

- ▶ An Application Base User can access Manage including access to Planning and Scheduling, Administration, Integration, Security, and System Configuration modules in any manner. An Application Base user also has access to Health and Safety.

▶ Application Limited User Restrictions

- ▶ An Application Limited User can use a maximum of three (3) modules within the Manage functionality of the Program, with the following exceptions;
 - ▶ 1) an Application Limited User can access all modules solely for the purpose of running and viewing reports, read only view of records, changing status of records and updates to Work Orders and conduct Inspections that have been assigned to the Application Limited User, and 2) notwithstanding 1), An Application Limited User cannot access Planning and Scheduling, Administration, Integration, Security, and System Configuration modules in any manner.

Administrative User Type AppPoint Allotment

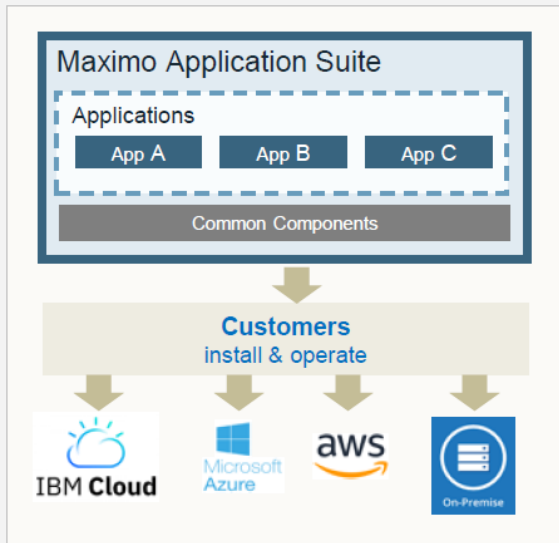

Administrative User	↓	↓	Notes
	Base	Premium	
Application	✓	✓	Application administrators administrates one or more applications, adds and assigns users to these applications, and uses the application-specific user interfaces to manage further user privileges.
Suite		✓	Suite administrator manages overarching system configuration settings from the Suite Administration pane.

- ▶ Administrators are defined users in the system
- ▶ Customers “reserve” a certain number of AppPoints to ensure Admins always have access
- ▶ Admins can access all Suite functionality, regardless of group.
 - ▶ Example: A Manage administrator is tagged as an Application Admin User - and withdraws 10 AppPoints. That admin can access and administer Predict, which is in the Premium group.
- ▶ Admin Users can also be ‘users’ within the MAS applications as long as proper AppPoints are allocated based on role.
 - ▶ For example - if a Predict user then must also be a Premium Admin user for 15 AppPoints.

Two MAS Deployment options for maximum flexibility

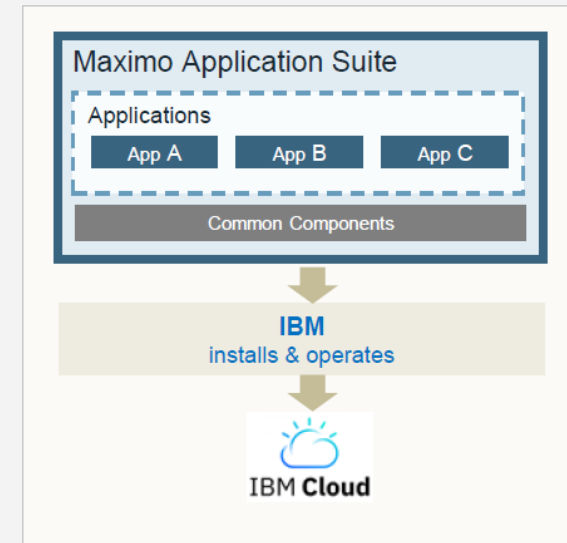

Managed by You / MACS

1. Purchase software only
2. Host it in the cloud or environment of your choice

Managed by IBM

1. Purchase software and hosting fees
2. Let IBM's trusted team take care of hosting for you
